Grade	0.33 out of 0.65 (50%)

Question 1

Incorrect

Mark 0.00 out of 1.00

🚩 Flag question

The World Bank has adopted a climate-risk-management approach which focuses on the ❌ of development efforts to both present-day weather variability as well as projected climate change. To help countries manage their risks, water-related investment projects will help determine the impacts of climate change on hydrology and water use, identify appropriate options, guidelines, and methodologies for ❌.

Your answer is incorrect.

The correct answer is:

The World Bank has adopted a climate-risk-management approach which focuses on the [reliance] of development efforts to both present-day weather variability as well as projected climate change. To help countries manage their risks, water-related investment projects will help determine the impacts of climate change on hydrology and water use, identify appropriate options, guidelines, and methodologies for [adaptation].

Question 2

Correct

Mark 1.00 out of 1.00

🚩 Flag question

Managing water resources using an ✔️ approach will be critical to mitigate social, economic and environmental impacts. Coastal ✔️ management, water supply, and infrastructure as well as agriculture will all be affected. The effects on natural systems will be widespread: from accelerated ✔️ melt, altered precipitation, runoff, and groundwater recharge patterns, to extreme droughts and floods, water quality changes, saltwater ✔️ in coastal aquifers and changes in water use.

Your answer is correct.

The correct answer is:

Managing water resources using an [integrated] approach will be critical to mitigate social, economic and environmental impacts. Coastal [zone] management, water supply, and infrastructure as well as agriculture will all be affected. The effects on natural systems will be widespread: from accelerated [glacier] melt, altered precipitation, runoff, and groundwater recharge patterns, to extreme droughts and floods, water quality changes, saltwater [intrusion] in coastal aquifers and changes in water use.

Question 3

Partially correct

Mark 0.50 out of 1.00

🚩 Flag question

For poor countries that have always faced hydrologic ❌, climate change will make water security even more difficult and costly to achieve. Climate change may also reintroduce water security ❌ in countries that for a hundred years have enjoyed reliable water supplies and few, if any, water ✔️. Much of the developing world will have to cope with droughts and/or the growing risk of flooding. Currently, 1.6 billion people live in countries and regions with water ✔️ and the number is expected to rise to 2.8 billion people by 2025.

Your answer is partially correct.

You have correctly selected 2.

The correct answer is:

For poor countries that have always faced hydrologic [variability], climate change will make water security even more difficult and costly to achieve. Climate change may also reintroduce water security [challenges] in countries that for a hundred years have enjoyed reliable water supplies and few, if any, water [shortages]. Much of the developing world will have to cope with droughts and/or the growing risk of flooding. Currently, 1.6 billion people live in countries and regions with water [scarcity] and the number is expected to rise to 2.8 billion people by 2025.

Question 1

Incorrect

Mark 0.00 out of 1.00

Flag question

Ecosystem degradation very often proceeds first through the violation of values, access and use rights and ultimately the rights to freedom, life and dignity of many disempowered communities.

Select one:

☐ a. simple

☒ b. complex ❌

☐ c. compound-complex

☐ d. compound

Your answer is incorrect.

The correct answer is: simple

Question 2

Incorrect

Mark 0.00 out of 1.00

Flag question

While sustainable consumption and production research and action mostly focuses on technological or behavioral change, the socio-ecological inequalities driving production-consumption systems built into the organization of our global political economy, remain largely overlooked.

Select one:

☐ a. simple

☐ b. complex

☐ c. compound

☒ d. compound-complex ❌

Your answer is incorrect.

The correct answer is: complex

Question 3

Incorrect

Mark 0.00 out of 1.00

Flag question

Recognizing this inherently political nature of producing and reproducing production-consumption systems, the structural political economy orientation brings an analysis of power into the center of inquiry.

Select one:

☐ a. simple

☐ b. compound

☒ c. complex ❌

☐ d. compound-complex

Your answer is incorrect.

The correct answer is: simple

Question 4

Correct

Mark 1.00 out of 1.00

Flag question

The centrality of power, inequality and injustice in these production-consumption systems necessitates a structural political economy orientation.

Select one:

☐ a. compound

☐ b. complex

☐ c. compound-complex

☒ d. simple ✔️

Your answer is correct.

The correct answer is: simple

Question 5

Correct

Mark 1.00 out of 1.00

Flag question

The critical task for developing a research and action agenda is therefore to analyze how such inequalities are produced and reproduced.

Select one:

1.00

[Flag question](#)

- ☒ a. complex ✓
- ☐ b. compound-complex
- ☐ c. compound
- ☐ d. simple

Your answer is correct.

The correct answer is: complex

Question 6

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

Inequality enables the more powerful and affluent global citizens to over-consume without internalizing the associated socio-ecological costs such as degradation, pollution, and loss of access to resources.

Select one:

- ☒ a. complex ✗
- ☐ b. compound-complex
- ☐ c. compound
- ☐ d. simple

Your answer is incorrect.

The correct answer is: simple

Question 7

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

Resource frontiers such as mining regions, new agricultural lands, hydropower sites and rainforests across the world illustrate the impacts of distant national and international priorities and policies as well as a deep history of colonial and post-colonial exploitation.

Select one:

- ☐ a. complex
- ☐ b. simple
- ☒ c. compound-complex ✗
- ☐ d. compound

Your answer is incorrect.

The correct answer is: simple

Question 8

Correct

Mark 1.00 out of 1.00

[Flag question](#)

Many prominent views on justice address the symptom of inequality but they do not consider the structures that produce them.

Select one:

- ☐ a. complex
- ☐ b. simple
- ☐ c. compound-complex
- ☒ d. compound ✓

Your answer is correct.

The correct answer is: compound

Question 9

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

Calculating both public and private debt, the International Monetary Fund estimated global debt in 2016 at \$164 trillion, which is about 225% of global GDP.

Select one:

- ☒ a. compound-complex ✗
- ☐ b. compound
- ☐ c. simple
- ☐ d. complex

Your answer is incorrect.

The correct answer is: complex

Question 10

Correct

Mark 1.00 out of 1.00

[Flag question](#)

Contemporary production-consumption systems have already breached planetary boundaries.

Select one:

- ☐ a. compound
- ☐ b. compound-complex
- ☐ c. complex
- ☒ d. simple ✓

☒ a. simple ✓

Your answer is correct.

The correct answer is: simple

Question 11

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

What a variety of political economy frameworks share is a focus on both economics and politics, rather than treating them as unrelated social realms.

Select one:

- ☒ a. compound-complex ✗
- ☐ b. compound
- ☐ c. complex
- ☐ d. simple

Your answer is incorrect.

The correct answer is: complex

Question 12

Correct

Mark 1.00 out of 1.00

[Flag question](#)

While aggregate population growth is a multiplier with non-linear impacts on environmental degradation, the linkages between poverty and environmental degradation are shown to be complex products of inequality, institutional arrangements, conflicts between and within groups and, crucially, environmental degradation that deepens poverty and we argue that these injustices and inequalities are at the very root of unsustainable production-consumption systems.

Select one:

- ☐ a. simple
- ☐ b. complex
- ☒ c. compound-complex ✓
- ☐ d. compound

Your answer is correct.

The correct answer is: compound-complex

Question 13

Correct

Mark 1.00 out of 1.00

[Flag question](#)

Environmental values like clean air and fresh water that are essential for a fulfilling life should not be commodified for the market.

Select one:

- ☐ a. compound
- ☐ b. simple
- ☒ c. complex ✓
- ☐ d. compound-complex

Your answer is correct.

The correct answer is: complex

Question 14

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

Assuming the position of production in the production-consumption dynamic as the locus of power, it is deemed that this highly skewed accrual of power is engendered by, and is generative of, inequality and, thus, injustice that weakens (or preempts) effective social interrogation of the scope and scale of production-consumptions systems.

Select one:

- ☐ a. compound
- ☐ b. complex
- ☒ c. compound-complex ✗
- ☐ d. simple

Your answer is incorrect.

The correct answer is: complex

Question 15

Correct

Mark 1.00 out of 1.00

[Flag question](#)

A wide range of factors, including access to resources and the socio-cultural construction of demand, shape production-consumption systems.

Select one:

- ☐ a. compound
- ☒ b. simple ✓
- ☐ c. complex
- ☐ d. compound-complex

Your answer is correct.

The correct answer is: simple

Partially correct

Mark 6.00 out of 15.00

🚩 Flag question

distribution	indicate	appropriate	barriers	measures
tangible	crucial	upheavals	intervention	irreversible
concentrate	reflected	integration	urgent	directives

The European Community, together with its Member States, is working intensively to improve energy efficiency in all end-use sectors whilst at the same time increasing the use of renewable energies. This decade will be ¹ to solve environmental, self-sufficiency and cost problems and adequately provide for increasing needs for lighting, heating, cooling and motive power without major ². This is especially true when seen in the light of the Kyoto Agreement to reduce CO₂ emissions, where improved energy efficiency will play a key role in meeting the EU Kyoto target in an economic way.

Projections ³ that an increase of energy efficiency of 1 percentage per year two- thirds of the available savings potential could be achieved by 2010 - resulting in avoided CO₂ emissions of almost 200 Mt/year or around 40% of the EU Kyoto commitment.

Community action is deemed necessary on several levels: the ⁴ of the energy efficiency dimension into related Community policy and programmes, legislation such as regulations and ⁵ and voluntary measures with industry are set forth where necessary. Promotional measures are initiated in order to support market forces and enhance transparency. All these measures are to promote energy efficiency and renewable energy sources in order to develop a system of energy production, ⁶ and consumption that aims at being safe, secure, cost-effective and sustainable. The European Commission's efforts ⁷ at the same time on removing ⁸ to a well-functioning market. This is done with the help of Community technology research and demonstration programmes, such as the 6th RTD Framework Programme (2002-2006) and with pro-active support programmes as Intelligent Energy - Europe (2003-2006).

Due mainly to the continued and increasing use of oil, our degree of important dependency in energy is now an ⁹ problem. Import dependency has increased from 40% in the eighties to currently 50% and is projected to rise up to 70% in the next 20 years if ¹⁰ measures are not taken. Intervention on the supply side being limited, it is rapid and significant ¹¹ on the energy demand side which could bring substantial results.

Energy consumption accounts for nearly 95% of the man-made CO₂ emissions and causes ¹² damage to our climate and environment as a whole. The Kyoto commitment of the European Community and its Member States are clear signals which need to be realised with ¹³ results.

The urgent need to react to these issues is ¹⁴ in the Green Paper on the security of energy supply. Two important communications setting out the strategy for energy efficiency were adopted in 2000: the **Action Plan for Energy Efficiency** and the European Climate Change Programme (ECCP). The Action Plan serves as umbrella document outlining programmes of Community legislative and non-legislative actions on energy efficiency. Many measures have been launched and put in place such as Directives and other policy ¹⁵ The ECCP was established to identify, analyse, evaluate and to recommend least-cost measures in all supply and end-use sectors for the EU to meet its Kyoto target.

Flag question

Sustaining Healthy Freshwater Ecosystems

Water scarcity has profound environmental and social makers . These include the implications of freshwater ecosystems and the loss of the goods and services these ecosystems provide, such as drinking water and biodiversity. Water degradation is predicted to be one of the key factors limiting development in the 21st century. Yet development agencies, national planners, and policy-scarcity often lack basic information needed to address water resource management problems. For example, indicators at the basin scale of water flow, water use, water quality, implement , and biodiversity are lacking for most of the watersheds in the world. Clean freshwater is essential for sustaining both people and species. However, it is a real challenge to globally resource programs for benefit in providing services that freshwater success provide. In order to transparent the status quo and manage water for people and nature we will need:

- good, reverse information at the basic level on socio-economic, hydrological and biological factors,
- ecosystems from and depend on these
- consideration of ecosystems as legitimate range of water to which part of the water resources are allocated.

WRI's goal is to catalyze action to address the water scarcity problem and its environmental and social implications and dispersed policy action.

There is an stimulate need for this information from policy makers, water resource managers, NGOs, and the private sector, who are struggling to allocate water to competitive uses, while maintaining functioning ecosystems. However, this information, when it exists, is users among different agencies, not standardized, and usually unavailable to a broad increasing of stakeholders.

Your answer is partially correct.

You have correctly selected 4.

The correct answer is:

Sustaining Healthy Freshwater Ecosystems

Water scarcity has profound environmental and social [implications]. These include the [degradation] of freshwater ecosystems and the loss of the goods and services these ecosystems provide, such as drinking water and biodiversity. Water [scarcity] is predicted to be one of the key [factors] limiting development in the 21st century. Yet development agencies, national planners, and policy-[makers] often lack basic information needed to address water [resource] management problems. For example, indicators at the basin scale of water flow, water use, water quality, [dams], and biodiversity are lacking for most of the [watersheds] in the world. Clean freshwater is essential for [sustaining] both people and species. However, it is a real challenge to globally [implement] programs for [success] in providing services that freshwater [ecosystems] provide. In order to [reverse] the status quo and manage water for people and nature we will need:

- good, [transparent] information at the basic level on socio-economic, hydrological and biological factors,
- [benefit] from and depend on these
- consideration of ecosystems as legitimate [users] of water to which part of the water resources are allocated.

WRI's goal is to catalyze action to address the water scarcity problem and its environmental and social implications and [stimulate] policy action.

There is an [increasing] need for this information from policy makers, water resource managers, NGOs, and the private sector, who are struggling to allocate water to competitive uses, while maintaining functioning ecosystems. However, this information, when it exists, is [dispersed] among different agencies, not standardized, and usually unavailable to a broad [range] of stakeholders.

Question 1

Correct

Mark 1.00 out of 1.00

🚩 Flag question

There is a clear need for continued ✓ and further research using new satellite altimeters and other observations, together with numerical ✓, to calculate the Greenland ice sheet melt versus gain balance, they conclude. **In** fact, large sums have been set aside in the European Union's Sixth Framework Programme (FP6) for research into climate change.

Your answer is correct.

The correct answer is:
There is a clear need for continued [monitoring] and further research using new satellite altimeters and other observations, together with numerical [models], to calculate the Greenland ice sheet melt versus gain balance, they conclude. **In** fact, large sums have been set aside in the European Union's Sixth Framework Programme (FP6) for research into climate change.

Question 2

Correct

Mark 1.00 out of 1.00

🚩 Flag question

This sort of research on "climate forcing" is far from straightforward, the scientists insist. Numerous variables, such as ✓ radiation and greenhouse gas levels, surface temperature, cloud cover, glacier-flow dynamics, precipitation and so on, can play into it.

Your answer is correct.

The correct answer is:
This sort of research on "climate forcing" is far from straightforward, the scientists insist. Numerous variables, such as [solar] radiation and greenhouse gas levels, surface temperature, cloud cover, glacier-flow dynamics, precipitation and so on, can play into it.

Question 3

Partially correct

Mark 0.50 out of 1.00

🚩 Flag question

An international team of climatologists and oceanographers, ✗ by the Nansen Environmental and Remote Sensing Center (NERSC) in Norway, estimates that Greenland's ✓ ice sheet has grown, on average, 6cm per year in areas above 1500m between 1992 and 2003.

Your answer is partially correct.

You have correctly selected 1.

The correct answer is:
An international team of climatologists and oceanographers, [led] by the Nansen Environmental and Remote Sensing Center (NERSC) in Norway, estimates that Greenland's [interior] ice sheet has grown, on average, 6cm per year in areas above 1500m between 1992 and 2003.

Question 4

Incorrect

Mark 0.00 out of 1.00

🚩 Flag question

Below 1500m, on the other hand, the team reports ice sheet ✗ by 2cm a year

Your answer is incorrect.

The correct answer is:
Below 1500m, on the other hand, the team reports ice sheet [thinning] by 2cm a year

Question 5

Incorrect

Mark 0.00 out of 1.00

🚩 Flag question

Greenland, or more particularly its huge ice sheets, has been the ✗ of increasing attention of late. Elevation or melting of these sheets can tell scientists much about regional - and ultimately - global climate change.

Your answer is incorrect.

The correct answer is:

Greenland, or more particularly its huge ice sheets, has been the [focus] of increasing attention of late. Elevation or melting of these sheets can tell scientists much about regional - and ultimately - global climate change.

Question **6**

Correct

Mark 1.00 out of 1.00

[Flag question](#)

A Norwegian-led team of scientists reports on an 11-year study of ice sheet growth in Greenland's vast interior. The findings, planned for publication in a leading scientific [journal] ✓ ; reveal a strong relationship between Greenland's ice sheets and global warming.

Your answer is correct.

The correct answer is:

A Norwegian-led team of scientists reports on an 11-year study of ice sheet growth in Greenland's vast interior. The findings, planned for publication in a leading scientific [journal]; reveal a strong relationship between Greenland's ice sheets and global warming.

Question **7**

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

What's more, it is difficult to collect [evaluated] ✗ ice-sheet readings of the vast high-altitude regions of Greenland.

Your answer is incorrect.

The correct answer is:

What's more, it is difficult to collect [reliable] ice-sheet readings of the vast high-altitude regions of Greenland.

Question **8**

Correct

Mark 1.00 out of 1.00

[Flag question](#)

As reported in Science, using Greenland's ice sheet figures and a special [index] ✓ , Johannessen and team confirm, for the first time, a direct relationship between the elevation change and the NAO.

Your answer is correct.

The correct answer is:

As reported in Science, using Greenland's ice sheet figures and a special [index], Johannessen and team confirm, for the first time, a direct relationship between the elevation change and the NAO.

Question **9**

Incorrect

Mark 0.00 out of 1.00

[Flag question](#)

Recent evidence of ice sheet growth found by Johannessen and company "does not necessarily reflect a long-term or future trend", they say. "Natural variability in the high-latitude climate system, including the NAO, is very large," so even their 11-year-long [exercises] ✗ is still short in the grand scale of climate change.

Your answer is incorrect.

The correct answer is:

Recent evidence of ice sheet growth found by Johannessen and company "does not necessarily reflect a long-term or future trend", they say. "Natural variability in the high-latitude climate system, including the NAO, is very large," so even their 11-year-long [study] is still short in the grand scale of climate change.

Question **10**

Correct

Mark 1.00 out of 1.00

[Flag question](#)

But they [caution] ✓ about drawing hasty conclusions from this sort of finding.

Your answer is correct.

The correct answer is:

But they [caution] about drawing hasty conclusions from this sort of finding.

Question **11**

Incorrect

Mark 0.00 out of 1.00

This [argues] ✗ earlier reports of high-elevation balance.

🚩 Flag question

Your answer is incorrect.
The correct answer is:
This [contradicts] earlier reports of high-elevation balance.

Question **12**
Correct
Mark 1.00 out of 1.00
🚩 Flag question

The average overall increase is 5.4cm per year, or equivalent to approximately 60cm during the 11 years - but perhaps as low 54cm a year when 'isostatic uplift' (post-Ice Age phenomenon causing the land to rise) is taken into ✓, Ola M. Johannessen of NERSC says the sheet growth is due to increased snowfall brought about by ✓ in regional atmospheric circulation, or the so-called North Atlantic Oscillation (NAO).

Your answer is correct.
The correct answer is:
The average overall increase is 5.4cm per year, or equivalent to approximately 60cm during the 11 years - but perhaps as low 54cm a year when 'isostatic uplift' (post-Ice Age phenomenon causing the land to rise) is taken into [account], Ola M. Johannessen of NERSC says the sheet growth is due to increased snowfall brought about by [variability] in regional atmospheric circulation, or the so-called North Atlantic Oscillation (NAO).

Question **13**
Correct
Mark 1.00 out of 1.00
🚩 Flag question

"The strong correlation between winter elevation changes and the NAO index suggests an underappreciated role of the winter season and the NAO for elevation changes - a wildcard in Greenland ice sheet mass-balance ✓ under global warming," notes the team.

Your answer is correct.
The correct answer is:
"The strong correlation between winter elevation changes and the NAO index suggests an underappreciated role of the winter season and the NAO for elevation changes - a wildcard in Greenland ice sheet mass-balance [scenarios] under global warming," notes the team.

Question 1

Incorrect

Mark 0.00 out of 1.00

Flag question

The capacity of water for neutralizing an acid solution.

Select one:

☐ a. bedrock

☒ b. effluent ❌

☐ c. alkalinity

Your answer is incorrect.

The correct answer is: alkalinity

Question 2

Correct

Mark 1.00 out of 1.00

Flag question

A substance that has a pH of less than 7, which is neutral.

Select one:

☐ a. desalination

☐ b. bedrock

☒ c. acid ✔️

Your answer is correct.

The correct answer is: acid

Question 3

Correct

Mark 1.00 out of 1.00

Flag question

A pipe, conduit, or channel designed to transport water from a remote source, usually by gravity.

Select one:

☐ a. desalination

☒ b. aqueduct ✔️

☐ c. alluvium

Your answer is correct.

The correct answer is: aqueduct

Question 4

Incorrect

Mark 0.00 out of 1.00

Flag question

A water-quality indication of the concentration of alkaline salts in water, mainly calcium and magnesium

Select one:

☐ a. hardness

☐ b. alkalinity

☒ c. aquifer ❌

Your answer is incorrect.

The correct answer is: hardness

Question 5

Correct

Mark 1.00 out of 1.00

Flag question

Water that flows from a sewage treatment plant after it has been treated

Select one:

☒ a. effluent ✔️

☐ b. aquifer

☐ c. acid

Your answer is correct.
The correct answer is: effluent

Question **6**
Correct
Mark 1.00 out of 1.00
[Flag question](#)

The solid rock beneath the soil and superficial rock

Select one:

- ☐ a. alkalinity
- ☒ b. bedrock ✓
- ☐ c. alluvium

Your answer is correct.
The correct answer is: bedrock

Question **7**
Incorrect
Mark 0.00 out of 1.00
[Flag question](#)

A geologic formation(s) that is water bearing. A geological formation or structure that stores and/or transmits water, such as to wells and springs.

Select one:

- ☐ a. alkalinity
- ☐ b. aquifer
- ☒ c. leaching ✗

Your answer is incorrect.
The correct answer is: aquifer

Question **8**
Correct
Mark 1.00 out of 1.00
[Flag question](#)

Deposits of clay, silt, sand, gravel, or other particulate material that have been deposited by a stream or other body of running water in a streambed, on a flood plain, on a delta, or at the base of a mountain are called:

Select one:

- ☐ a. hardness
- ☒ b. alluvium ✓
- ☐ c. leaching

Your answer is correct.
The correct answer is: alluvium

Question **9**
Correct
Mark 1.00 out of 1.00
[Flag question](#)

The removal of salts from saline water to provide freshwater

Select one:

- ☐ a. aqueduct
- ☒ b. desalination ✓
- ☐ c. effluent

Your answer is correct.
The correct answer is: desalination

Question **10**
Incorrect
Mark 0.00 out of 1.00
[Flag question](#)

The process by which soluble materials in the soil, such as salts, nutrients, pesticide chemicals or contaminants, are washed into a lower layer of soil or are dissolved and carried away by water.

Select one:

- ☐ a. leaching
- ☐ b. aqueduct
- ☒ c. hardness ✗

Your answer is incorrect.
The correct answer is: leaching
